

# Oobleck!

**Materials:** 1 cup of cornstarch, 1/2 cup of water, food coloring

## Procedure:

1. Mix everything together.
2. Dive in! Oobleck has an incredible texture and consistency!  
When you touch/squeeze it, it becomes a solid BUT when you release that pressure, it turns into a liquid!

**Question to think about:**  
What other properties do you notice?
